September 30, 2015

Dear Parents/Guardians,

The entire month of October will be Sea & Learn month on Saba. Sea & Learn is an annual event in which scientists share their knowledge and expertise to explore nature and grow environmental awareness. Saba Comprehensive School seizes this opportunity for students to get into direct contact with nature and science through field trips and class activities with the experts from all over the world.

On October 1st, 4v and 4v will start this Sea & Learn month with a field trip to the tide pools to learn about Saba's geologically violent origins. Throughout the month, your son/daughter will have class activities and field trips about topics ranging from snakes, moths and sharks, to waves and whales. The entire schedule can be found on the next page.

On our school's website: www.learningsaba.com and on our Facebook page you can also find the school's activities during this Sea & Learn month, as well as on Seaandlearn.org.

Saba Comprehensive School hopes that together with parents and guardians we can stimulate our students to explore Saba's immediate surroundings and gain knowledge and skills. If you have any questions or suggestions, or if you would like to help out, please don't hesitate to contact us.

Yours sincerely,

Rhiannon Jorna
SCS Sea & Learn Coordinator

Anton Hermans
Principal

Date	Time	Who	Class/ Form (N)	Location	Notes
